<td>We are so thrilled to introduce our first edition of Modblock. Our philosophy has always been that quilting should be fun, that there are no quilt police, and that a mistake is really just a new idea waiting to be developed! We feel the Modern movement fits in perfectly with our thinking. Modern quilts have sparked our desire to learn and try new techniques, to play with shapes, try new colors, and break down the rules and barriers of traditional quilting. These types of patterns are perfect for beginners who are ready to break into the world of quilting. They are also fun for the more seasoned quilter who is ready to try something new. There is a new-found freedom that you feel when making a modern quilt. You can follow the pattern or break free and choose your own design path. There are no rules, just great ideas to help you get started! In this edition we will discuss color theory, improvisational piecing, traditional paper piecing, quilt-as-you-go, and the use of traditional quilting tools in unexpected ways. It is our goal to get you excited about trying new things and taking some quilting risks. We think the results will amaze and inspire you. We are so excited to share this with you and hope you enjoy this edition of Modblock. Let's go make cool stuff together!</td>

<td>ModBlock is back and this time we’re exploring the form and function of quilts. Quilts are both beautiful and useful. They aren’t just made to hang on a wall; they’re made to wrap around our loved ones. In this issue, we aim to be inspired by quilts of the past and make new traditions too. There’s no wrong way to go about it. Play with pattern, simplify, or even embellish, it’s all up to you. In addition to form and function, we talk about using negative space, simplifying designs, and using traditional quilt blocks in new ways. Our goal is to help you see existing patterns with new eyes, or venture into uncharted territory and try something entirely different. With simple techniques, a whole new world of possibilities can open up for you! Thank you for joining us and we hope you love this issue of Modblock. Let’s go create something awesome together!</td>
